Not really, no.

I would do something like this:

```
data = LoadData(2)
CTLoad, 33
FSC_Contour, data, NLevels=12, /FILL, $
    Position=[0.1, 0.1, 0.82, 0.9], /Window
FSC_Contour, data, /Overplot, Color='gray', /AddCmd
FSC_Colorbar, /Vertical, /Right, Divisions=5, $
    Range=[Min(data),Max(data)], $
    Position=[0.85, 0.1, 0.89, 0.9], /AddCmd
```

Then, just choose the Send to PostScript button and
your PostScript output will look identical to what
you see on the display. :-)

You can find all the Coyote Library files you need
here:

<http://www.idlcoyote.com/programs/coyoteprograms.zip>

Cheers,

David
