
Subject: IDL progs for looking at CZCS HDF files?

I'm an inexperienced IDL v.4.0 user and am trying to use IDL to read and display CZCS data that I've obtained (ftp'd from Goddard Space Flight Centre DAAC) which are in HDF files. I've figured out how to get IDL to read the files, but it occurred to me that maybe someone out there (who knows more about IDL, HDF and CZCS than me) has already written a nice routine to do this, and to allow me to display mosaics of several files, with map coordinates indicated too? If so, would you be willing to share your code with me? Or do you know of an archive of publically available routines to do this? Or any other suggestions to save me re-inventing the wheel and making it square.

Many thanks, Anne.
