Subject: idl.el version 1.35

View Forum Message <> Reply to Message

I introduced a number of bugs with the changes in version 1.31.

Version 1.35 with the needed fixes is now available at the following locations:

  ftp://fermi.jhuapl.edu/pub/idl_emacs/idl.el
  ftp://eos.crseo.ucsb.edu/pub/idl/idl.el.Z

idl.el is an intelligent editing mode used in GNU emacs (and Xemacs which others use but I don't) for your ".pro" files. Also at the same locations you can find idl-shell.el for running IDL as a subprocess of emacs.

If you don't use emacs to edit IDL ".pro" files then this will not be relevant to you.
