Subject: new graphics legend

The documentation of the legend routine in the new graphics system seems incomplete. I'can't figure out how to change various legend properties. Specifically I would like to change the number of symbols plotted. Actually
I just want to show a single symbol, no line. I browsed through the IDLGrLegend properties, but don't seem to find a way to change the linesyle for the specific legend item either.

Any help appreciated.

Thanks
Axel
