Subject: Venerable Programs Retired

Folks,

It is with some degree of sadness that I announce the immediate retirement of four venerable programs that have served me well for a long, long time.

I have decided in the interest of moving forward with the development of the Coyote Graphics System and to keep a consistent interface for users of these programs, that all further development work on TVImage, FSC_Color, FSC_Colorbar, and CTLoad will end as of today. All further development will occur on their replacement programs cgImage, cgColor, cgColorbar, and cgLoadCT, respectively.

These four old workhorses are not going anywhere. I'm putting them out to pasture in the Coyote Library, where they can stay as long as they like. I just won't be riding them any more. Feel free to stop by and bring them a carrot any time you like. :-)

Cheers,

David
