I have this problem too.

The following code would not produce anything on my screen neither:

```
IDL> print, !VERSION
{ x86_64 linux unix linux 7.1.1 Aug 21 2009    64    64}
IDL> cgDisplay, /FREE, XSIZE=500, YSIZE=500, /PIXMAP
IDL> cgplot, LOADDATA(17)
IDL> xwin = !D.WINDOW
IDL> help, xwin
XWIN      LONG    =      44
IDL> wshow, xwin
```

So what are the alternatives? Currently I am doing this:

```
IDL> img = Transpose(tvrd(/TRUE), [1,2,0])
IDL> WDELETE, xwin
IDL> cgDisplay, /FREE, XSIZE=500, YSIZE=500
IDL> cgImage, img
```

But is there a better solution ?

Thanks a lot!

Fab
