Hi there,

I am trying to make a plot and to export it in png with Ps_start and Ps_end but the problem is that the png file missed somethings written with xyouts on the right and ths ps file don't.

Here is the code, text missing is pointed with arrow

```
PS_start,filename='Lidar Ozone anomalies and fit.ps',/
nomatch,charsize=0.8
!p.font=0 ;use postscript fonts
!p.thick=3 ;data
!x.thick=2 ;x axis
!y.thick=2 ;y axis
device, /helvetica, /isolatin1, xsize=16, ysize=18, decomposed=0, /
color
plot,time,Zproxy,/nodata,xstyle=1,xrange=[anneedeb,
2011],ystyle=1,yrange=[15,50],title='Lidar Ozone anomalies (black) and
regression fit (red)',$
    ytitle='Altitude (km)',xticks=n_elements(annee),xtickn=[annee,
2011]
xyouts, 2011.5, 48,'R!E2' <---
for k=0,n_elements(Zproxy)-1,5 do begin
    oplot,time,[Zproxy(k),Zproxy(k)],linestyle=1
    oplot,time,2*Ti(*,k)+Zproxy(k),color=0
    oplot,time,2*mco_T(*,k)+Zproxy(k),color=204
    xyouts, 2011, Zproxy(k),R2str(k) <---
endfor
xyouts, 1996, 13,'(0.5 ppmv scaled to 1km)'
xyouts, 2002.6, 13,'Year'
PS_end,/png
```

If you have an idea ...

Thanks
