Yeah, I thought about this. I knew this was coming.
I didn't do it because there would have to be controls
for rasters with and without ImageMagick. I think it
needs to be done. But I need to prioritize my time
right now, and this got put down at the bottom of the
prioritized ToDo list. It is NOT hard to do. You
could probably figure it out and send it to me, now
that you have a prototype finished for you. :-)

Cheers,

David
