Dear Dr Fanning,

I am excited to see how you lead this group discussion on the IDL
language. It is very useful for my work with IDL. I would like to be
able to purchase your book in the printed way, but I also notice that
you have the chance to make many updates to the programs in the book
(cg*.pro). Can I ask how the book shall keep in line with the updated
programs? Is there a chance the book will be out of date when new
programs are on your website? I hope there is some way to solve this
problem.

Sincerely,
Matteo.
