> Speaking of which, I've got another odd issue with the aspect ratio of output. If I output a postscript file, I get the wrong aspect ratio, but if I out a .png file via ImageMagick, I get the right aspect ratio. Even weirder is that if I set ps_delete=0, the intermediate postscript file has the *right* aspect ratio.

And what's even more weirder (bad grammar intentional) is that I am having the opposite problem.

My postscript files have the right aspect, but the .png file created via ImageMagick has the wrong aspect. I will try to make an example code. --Wayne
