---

This is what I get

```
IDL> print,!version
{ x86_64 linux unix linux 8.0.1 Oct 7 2010    64    64}
IDL> a={b:dindgen(10)}
IDL> help,(a.b)[!null]
<Expression> UNDEFINED = !NULL
% Temporary variables are still checked out - cleaning up...
IDL> help,a.b[!null]
Segmentation fault (core dumped)
```
