
Subject: Contour plots on irregular ranges

I'm considering getting PV-Wave, but am concerned whether it can do contour plots over irregular ranges of data (i.e. z values for non-square sets of x-y points). I've only got access to a demo version with summary "manuals" - and the only contour examples I've seen are over nice square/rectangular (x,y) ranges.

Thanks, John Galambos (email - galambos@ornl.gov)
