Hi,

I should probably know this by now... what's going on below?

```
IDL> c = factorial(21)/(factorial(3)*factorial(21-3))
```

```
IDL> print, c
```

```
1330.0000
```

```
IDL> myvec = dblarr(c)
```

```
IDL> help, myvec
```

```
MYVEC      DOUBLE  = Array[1329]
```

I'd like myvec to have 1330 elements... not 1329.

Thanks in advance.
