
Subject: Floating illegal operand error when reach end of for loop

Hey all,

I'm applying the function `mkstrend` (see:

<http://objectmix.com/idl-pvwave/336583-code-kendall-trend-test.html>)
within a double for loop (for row, for column). All is fine until I
reach the end of the loop. After the last row and column is processed,
I get a "Floating illegal operand" error and my program crashes. The
same thing happens if I change the number of rows and columns I'm
looping through.

Why is this happening and how do I fix? Thanks!
