Subject: Source Control IDL 8.1
Posted by David Fanning on Wed, 04 May 2011 16:00:18 GMT

Folks,

I had heard that IDL 8.1 had source control management
plug-ins for Subversion and other management tools, but
I can find no mention of this anywhere in the documentation.

Does anyone know how to use or install these tools
in the Workbench? Does anyone know where some documentation
about this process might be?

Thanks.

Cheers,

David
