I've updated my small collection of IDL tools,and tried to make the
online descriptions a little clearer.

Updates and bug fixes were done on:

Satellite Image Mapping Tool
(MISSING keyword now works properly, added NOERASE and LOWRES keywords,
now works with Postscript output)

HDF SDS Reader
(Fixed a bug that modified the START and COUNT keywords)

Binary Image Reader Widget
(Something I've had around for a while that I thought others might find
useful).

All of the above can be found at http://cimss.ssec.wisc.edu/~gumley

Cheers,
Liam.
