
Subject: SYM_OBJECT in plot3d?

Dear Folks,

The plot3d() function no longer appears to know about the sym_object keyword in IDL 8.1.

Here's a test case:

```
x = randomu(seed, 100)
y = randomu(seed, 100)
z = randomu(seed, 100)
oobj = obj_new('orb')
p = plot3d(x, y, z, sym_object = oobj)
```

```
PLOT3D: Unknown property: SYM_OBJECT
Execution halted at: $MAIN$
```

This is surprising because the SYM_OBJECT property is described in the documentation for PLOT3D()

Is this the bug that I think it is, or am I doing something wrong?

Thanks,

David
