Subject: Changing Plot Parameters in cgWindow

Folks,

Someone asked me this morning how to change plot parameters
in a cgWindow application. In answering, I discovered that
in one of my updates I had inadvertently switched the order
of two parameters in a call to the LinkedList method
Replace_Item. Thus, any call to the cgWindow method
ReplaceCommand was throwing an error.

I have fixed the cgWindow code and you can download
the updated version here:

   http://www.idlcoyote.com/programs/cgwindow.pro

It occurred to me that others might be interested in
the answer to this question, so I wrote an article
about it.

   http://www.idlcoyote.com/cg_tips/chgplot.php

Cheers,

David
