Hello,

I'm trying to use make_dll to create a shareable library. I get the following error:

'cl' is not recognized as an internal or external command, operable program or batch file.

Is 'cl' referring to 'c linker'? If so, is it a problem that the !dll_make.compiler_name system variable name is Microsoft Visual C++ 8.0 while I have Microsoft Visual C++ 10.0 (express) installed on my machine?

Any comments or suggestions?

Thanks!!!

Cindy
