
Subject: Request for additions to CONTOUR

In IDL v1.0 there used to be an option for printing the high or low value in the smallest closed contour, along with an H or L. I think that reflected RSI's meteorological roots, being similar to NCAR graphics.

Has anyone programmed this in new IDL (v3.0)? I can see how it would work conceptually, but I'm looking for a shortcut.

Also, if anyone has references to neural net code in IDL, please include me in your list.

Thanks...
