Subject: Coyote and Catalyst Library Updates

Folks,

I noticed a problem this morning with the software I use to maintain
the Coyote Library zip files. Apparently the option to "Update existing
files" is no longer working, as I noticed that files I thought I had
updated in the past two to three weeks were in fact, not updated. I
am not sure how long this has been a problem, so I created a totally
new zip file this morning containing the latest Coyote Library files.
I recommend everyone update their Coyote Library with either this
zip file or directly from the trunk repository of the Library
on the GoogleCode site.

The Catalyst Library has also apparently been affected by this
problem.

Sorry for the confusion.

Cheers,

David
