Subject: Mac Safari Question

Mac Users,

Can you think of a reason this link doesn't see the zip
file if pasted into Safari, but does if pasted into
Firefox running on a Mac?

   http://www.idlcoyote.com/programs/zip_files/coyoteprogram.zi p

In Safari (so I am told), it goes as far
as the zip_files directory, but shows nothing. :-(

Cheers,

David
