Subject: Re: Strange WHERE issue?
Posted by polystethylene on Fri, 27 May 2011 02:34:52 GMT

Hi guys,

Thanks for the replies, that's fixed the issue; took the expression
out of the boolean evaluation and set it to another variable, then
used 'variable[0]' in the where clause.

I was having a dim moment of sorts though; I've run into this before
and I'm fairly sure now that I even asked the same question here 2
years ago.

You were all quick to respond and equally helpful back then, too :)

Cheers,
Stef
