Subject: DICOM image query crashes IDL

Folks,

I am trying to query a DICOM image file, and every time
I touch it, IDL crashes. This is IDL 8.1.

```
file = Dialog_Pickfile(FILTER='*.dcm')
ok = Query_Dicom(file, info)
```

The error message has something to do with the image
having an "indefinite length". This particular DICOM
file uses a JPEG2000 transfer syntax.

Does anyone know anything at all about this?

Cheers,

David
