Subject: Automated plotting for website?
Posted by rjp23 on Fri, 03 Jun 2011 08:33:23 GMT

Hi

I was wondering if it was possible (and what's the best way) to automate the production of plots for a website.

i.e. When there's new data available, IDL runs and produces a plot which is then displayed on a website.

I seem to recall there was some built-in functionality to IDL that did something along these lines but I'm not sure what to search for.

Cheers

Rob
