One of the features available is you can "roll up" the
window. This is fabulous because I can pin the window
to stay on top of the IDL 8 workbench, then I can
move it over a part of the workbench I don't use, and
I can roll the window open or closed with just a click
of the button, as needed. When the window is rolled up,
just the window title bar is visible.

Just $20 for this program. If this were bundled into
IDL, it might be worth paying for maintenance!

Cheers,

David
