Dear Ruoai

I' ve also asked for code on curvelet and contourlt transform, but no
one answer. Probablly no one has such piece of code (or if someone has
he or she doesn't read this foroum). On the other hand there is code
for the transform in matlab (you already know this) and in C or C++ If
you have good knowledge in c, c++ you probaply be able to compile
theese pieces of code (personally i use windows, i am not a c, c++
programmer so i couldn't compile them. I also send e-mails to their
authors if could compile their softare for me , no one answer...)

If you use windows and you manage compile them or if you find some IDL
coden for theese tranforms, PLEASE inform me and assist me.

Thanks

Kostas.
