
Subject: Histogram plot in IDL using cgHistoplot

Hi,
I have to plot following data as a Histogram and I am using the
cgHistoplot command.

0-3	11
3-6	16
6-10	5
10-20	3
20-40	4
40-60	2

The problem is that my x-axis intervals are uneven and I want my X-axis to be labeled as 0-3, 3-6, 6-10 and so on.
Any idea how do I do plot this kind of histogram in IDL?

Thanks.
