Subject: Histrogram plot in IDL using cgHistoplot Posted by Sasha Singh on Tue, 14 Jun 2011 16:41:43 GMT

Hi,

I have to plot following data as a Histogram and I am using the cgHistoplot command.

0-3 11

3-6 16

6-10 5

10-20 3

20-40 4

40-60 2

The problem is that my x-axis intervals are uneven and I want my X-axis to be labeled as 0-3, 3-6, 6-10 and so on. Any idea how do I do plot this kind of histogram in IDL?

Thanks.
