Subject: Re: Connecting GPC to IDL Posted by Haje Korth on Fri, 10 Jun 2011 13:52:27 GMT View Forum Message <> Reply to Message

Kelly: I have always found using gcc with IDL on Windows to be a difficult endeavor. Also, the use of make_dll is optional and in the past has made life more difficult rather than easier. I suggest grabbing the free edition of Visual Studio Express and creating the dll this way. Just remember to export the functions you will be accessing from IDL. This is definitely an advanced topic, so start with the simple examples in the external directory of the IDL distro. Haje

 I ahve reviewed some different ways to implement this, I have
 determine that the following routines can be used:

There is a GCP DLL provided thru the MatLab Contrib site. I am playing
