
Subject: Why "Attempt to call undefined procedure/function: 'CGQUERY'"

Hi, guys:

When I use "resolve_all" command to compile programs, and got the following errors:

```
% Compiled module: CGAXIS.  
% Compiled module: CGCOLORFILL.  
% Compiled module: CGCONTROL.  
% Compiled module: CGERASE.  
% Compiled module: CGLOADCT.  
% Compiled module: CGPLOT.  
% Compiled module: CGPLOTS.  
% Compiled module: CGQUERY.  
% Attempt to call undefined procedure/function: 'CGQUERY'.  
% Execution halted at: RESOLVE_ALL_BODY 289 D:\ITT\IDL\IDL80\lib  
\resolve_all.pro  
%          RESOLVE_ALL    364 D:\ITT\IDL\IDL80\lib  
\resolve_all.pro  
%          $MAIN$
```

So, "CGQUERY" is in the IDL path, and why IDL can not compile the "CGQUERY"?

Dave
