| Subject: length of an ascii file Posted by R. Bauer on Mon, 30 Dec 1996 08:00:00 GMT View Forum Message <> Reply to Message |
|---|
| Hi, |
| I like to read ascii files at once, therefore I need to know how much bytes are in the file. |
| Or how much 10B are in the file. |
| |
| I know spawn, 'Is *.dat', result |
| to get the lenght of the file, |
| but I like to have a real idl funtion or procedure for this. |
| Thanks |
| Did you have an idea? |
