There have been a bunch of updates to JBIU over the past few months. Most have not been critical, but I just discovered a bug in the flagship MATCHALL_SPH (also used by MATCH_SPH) that occasionally caused some matches to be missed. So if you use that, please download the current version!

(other new stuff since March: JBLINFIT, COMBIGEN, SIXTYV, MINFINITE, IS_SORTED, READPARAM, HIST_ND_ADAPTIVE and SHAPE_ITERATIVE. Bug fixes and improvements to MATCH_SPH, MATCH_ND, XLADDER, YLADDER, XYLADDER, HISTEQ, ORD, HIST_ND_WEIGHT, READDOLPHOT and INERTIATENS)
