---

I just write a simple IDL program, while the major code write in IDL with some function of ENVI to speed up my programing.

example:

```
PRO test_read
COMPILE_OPT idl2
file_name = DIALOG_PICKFILE(/READ,FILTER='*.*')
ENVI_OPEN_FILE, file_name, r_fid=r_dem,/NO_REALIZE
IF (r_dem EQ -1) THEN RETURN
END
```

I hope to release this code running without ENVI, what should I do?
