Subject: Arrow object?

Posted by Jianbao on Sun, 28 Aug 2011 04:18:26 GMT

Hello everyone,

I know there is an Arrow function in the new IDL graphics system, which I suspect is built with the IDL class library. So, according to the IDL naming convention, I suspected there would be something like IDLgrArrow existed. However, I didn't find anything like that.

It would be prefect to add some annotating arrows in a 3D plot I made with the IDL class library. So, I am wondering if anybody know there is an easy way to do this. Any help would be appreciated. Thank you very much.

Jim
