This would have to be a widget program with resizable windows. Check out David Fanning's website for several examples.

<http://www.dfanning.com/>

> Also, is there a command to dump the contents of an Xwindow to a
> postscript file? This would be similar to the simple print command
> found in Matlab.

```
wset, windowid  
dump = tvrd()  
currentDevice = !d.name  
set_plot,'ps'  
tv,dump  
device,/close  
set_plot,currentDevice
```

Check out the resource guide and help on device for more info on creating postscript files.

Hope this helps,
Phil
