Ah, of course. Should have known. No reason for
landscape PostScript output, I guess. Thanks!

I suppose it is asking for too much to think I would
get an error message if I used a keyword that wasn't
allowed.

Cheers,

David

P.S. I guess I'll have to check with my children, but
is PostScript landscape mode s-o-o-o 1970s, in the same way
I'm told e-mail is? It's distressing, because I think
every PostScript file I make in the old graphics system
is PostScript landscape. I've *got* to get more up to date! :-(
