Hi Rob,

no loop necessary:

```
array=(randomu(seed,2,6,360,42)-.1)>0. ; sample array
array=reform(array,n_elements(array)/42,42,/overwrite)
ii=where(min(array,dim=2) eq 0.,count)
if count ge 1 then array[ii,*]=0.
array=reform(array,2,6,360,42,/overwrite)
```

Heinz
