Subject: Window with Black Background

Posted by David Fanning on Thu, 15 Dec 2011 13:53:56 GMT

Folks,

I was just fooling around here a minute ago and I accidentally
typed a Plot command. A graphics window with a black background
suddenly popped up in front me. It startled me. I haven't seen
a graphics window with a black background in a LONG time. I
forgot that this is what we used to do graphics in! :-)

Cheers,

David
