ok.

p = plot(x, y, LINESTYLE=6, SYMBOL='+') is equivalent to the old

style: plot, x, y, PSYM=1

t = text(x, y, s, alignment='center', /data) is equivalent to the old

style: xyouts, x, y, s, ALIGN=0.5

then you have to play with the position of the text annotation or to
suppress it, according to what you actually want to display.

alx.
