Subject: ps_start and cgDCBar error
Posted by Dave[4] on Thu, 29 Dec 2011 08:59:45 GMT

Hi, David:
   when I use ps_start and cgDCbar program with the latest coyote
package. I got following errors:

For ps_start.pro, I fin this program can change filename, like:

outfilename = 'D:\test.ps'
ps_start, filename=outfilename
print, outfilename
>> 'test.ps'

For cgDCbar, there is line

'PS': IF supportTrueColorTHEN DEVICE, DECOMPOSED=0

which supportTrueColor is not defined.

You may fix those problems. Very thanks.

Dave
