hello guys,

Did you ever had this problem trying to save a PostScript using the
object IDlgrClipboard ?

```
*** glibc detected *** /usr/local/itt/idl/idl81/bin/bin.linux.x86_64/  
idl: double free or corruption (!prev): 0x00000000047a8900 ***  
===== Backtrace: =====

...  
bla bla bla
```

Any suggestions ? Help, ?
Thank you
