IDL 8.0 was working fine before I updated my machine to Mac OSX 10.7.3 from 10.7.2. Now, when I try to open IDL, I get a full crash report before workbench opens. I can open ENVI+IDL, but IDL is open only in an X11 pane. My guess is there is a problem with the Workbench. Has anyone seen this problem before?

Warning to other Mac users! Don't use software update just yet!
