Subject: creating variables in a FOR loop
Posted by Rohit Deshpande on Thu, 02 Feb 2012 14:53:13 GMT

Hello All,

I would like to read in 6 files and associate 6 variables in which to
store the information. In the code below, I like to create variables
which names, "m_0, im_1 and so on. However, I get s 'Syntax error' in
line 6. Please help! Thanks in advance.

```
1   PRO CCFs
2    files=file_search('*.fits')
3    FOR i = 0, n_elements(files)-1 DO BEGIN
4  temp = i
5  'im_'+strtrim(temp,2) = mrdfits(files[i],0,h)
6    ENDFOR
7
8  END
```
