Subject: ENVI or Analyst License
Posted by kisCA on Mon, 06 Feb 2012 22:32:16 GMT

Hi there,

I would like to use some clustering method (like kmeans, som or even
PCA) with IDL. I already found some algorithm that works with ENVI for
almost everything. I also saw that the analyst license can provide
some useful function too. If anybody else already tried one or both of
them i would appreciate some feedback before buying a license that
might not be necessary.

Thanks for your help
