First of all, I want to thank you all of you for your suggestions.

Second, just say that all this months, days and temperatures was just an example of what I want to do, so I need a general way to proceed.

Third, I'm running IDL v7, so the solutions for IDL v8 don't work for me.

So I'm trying to learn how to use structures, but they are a bit confusing to me and the information I have obtained from google is not helping too much. I would appreciate any example or link to a webpage showing how to use structures. Thanks in advance!

Israel
