Alright, well, let's do this the hard way then. :-)

Type these commands at your IDL command prompt:

```
IDL> .Full_Reset  
IDL> x = findgen(100)  
IDL> y = sqrt(x)  
IDL> pl = plot(x, y)
```

If these commands cause an error, then type this:

```
IDL> Help, /Source
```

And then let's see **that** listing! :-)

Cheers,

David
