Most likely, you are after something like this:

[http://lr.tudelft.nl/en/organisation/departments-and-chairs/
remote-sensing/mathematical-geodesy-and-positioning/research/lambda-method/](http://lr.tudelft.nl/en/organisation/departments-and-chairs/remote-sensing/mathematical-geodesy-and-positioning/research/lambda-method/)

No IDL code, but they claim to provide Matlab and Fortran code upon request. Worth a try.
