My guess is that you are doing integer division in the denominator.

```
IDL> T = 20
```

```
IDL> Ny = 360
```

```
IDL> print, 1/(Ny*T)
```

```
0
```

```
IDL> freq_centre = 2.35e-3
```

```
IDL> print, freq_centre/(1/(Ny*T))
```

```
Inf
```

```
% Program caused arithmetic error: Floating divide by 0
```

```
IDL> print, freq_centre/(1./(Ny*T))
```

```
16.9200
```

```
--
```
