Subject: How to erase a (function graphics) plot.

I am building a widget application with a widget_window for displaying function graphics plots.
By default, function graphics does not erase the old plot in the same window.

p1 = plot(indgen(10))
p2 = plot(sin(indgen(10),/current)

There is a delete method

p1.delete

but that doesn't delete the axes, which still get jumbled together.   There is a close method but
that destroys the window, and I'd like to keep reusing the widget_window.

Right now I am erasing the plot by loading a white IMAGE() but I hope there is a better way.

 Thanks, --Wayne
